There were six students A, B, C, D, E and F had written different exams Maths, Biology, Physics, GK, Hindi and Chemistry but not necessarily in the same order and scored different marks. All of them are sitting in a circular table and facing the centre with equidistance to each other.

C sits second to the right of the one who had written Maths exam. A sits opposite to C. B sits second to the left of the one who scored 98 marks. The one who had written GK exam sits second to the left of the one who scored 93 marks. B scored 2nd highest mark. C sits to the immediate left of the one who had written Biology exam. B does not write Chemistry exam. The difference between the marks scored by A and D is divisible by 3. The one who had written chemistry sits opposite to D. F is not an immediate neighbour of B. C had scored 90 marks. 80 is the lowest mark. The difference between the marks scored by F and the one who had written Hindi is 5. The one who scored a mark in prime number sits exactly between the one who had written Physics exam and B. Here the prime number is less than 90 but not 89. D do not scored a mark in prime number. E scored less than 85 marks.

Q16. What is the position of E with respect to C?

1. Second to the left
2. second to the right
3. third to the right
4. Third to the left
5. fourth to the right

Q17. Four of the following five are alike in a certain way based on the seating arrangement and thus form a group. Who among the following one that does not belong to the group?

1. FD
2. EA
3. BC
4. DC
5. AF

Q18. Which of the following order is true?
