English Section

In the following passage, some of the words have been left out, each of which is indicated by a number. Find the suitable word from the options given against each number and fill up the blanks with appropriate words to make the paragraph meaningfully complete.

In any strong **(1)** context, any inter-caste, interreligious or interregional marriage faces opposition from different sections of society. But there is a difference in the three categories.

Interregional marriages, for example, are considered relatively less objectionable. Such marriages between two persons belonging to culturally different regions **(2)** to be organised around common life that is shared by the spouses on the grounds that it offers modern culture based on autonomy and individuality. In that respect, it looks progressive to some, but it does not go far enough in terms of its **(3)** These marriages, though forming into modern culture, still have a narrow social base. Meaning, these marriages arguably happen within and between twice-born castes.

Arguably, the opposition to interregional marriages is not **(4)** because the social background in most of the cases is the same. The opposition to inter-caste marriages is continuous and is much more violent, leading to physical elimination through both active and passive murder. The crime of murder acquires an active character when the couple is murdered by the parents from either side. The murder acquires a passive character when the couple is **(5)** to a decision such as suicide. It is quite ironic that the state promotion of such marriages, particularly between lower-caste and upper-caste persons, runs contrary to the patriarchal power that regulates matrimonial relations through jati panchayat or caste associations.

Answers :

1) Answer: B

Required ratio = $3600:(12000 - 7200)$

= 3:4

2) Answer: C

Number of accounts in Indian bank = $5/4 * 14400 = 18000$

Number of current accounts in Indian bank = $10800 - 3600 = 7200$

Number of saving accounts in Indian bank = $18000 - 7200 = 10800$

3) Answer: A

Number of current accounts in SBI = $12000 - 7200 = 4800$

Number of current accounts in IOB = $14400 - 9000 = 5400$

Number of current accounts in BOB = $9600 - 3600 = 6000$

Number of current accounts in BOM = $(4800 + 5400 + 6000)/3 = 5400$

Number of saving accounts in BOM = $5/4 * 5400 = 6750$

4) Answer: D

Number of current accounts in IOB = $14400 - 9000 = 5400$

Required difference = $7200 - 5400 = 1800$

5) Answer: E

Required total = $3600 + (10800 - 3600) * 50/100 + 3600 * 80/100 + (9600 - 3600)$
