Directions (71-79): Read the passage given below and answer the following questions.

The onset of Covid-19 has brought to a halt an astonishing expansion of restaurants observed in the past decade. But being deprived of restaurants has made people realise how much they value them. Eating out fulfils needs which seem fundamental to human nature. People need to socialise, to seal deals and to peer at their fellow humans.

People have long feasted outside the home. Before the use of coal became widespread in England in the 17th century, preparing food at home involved spending a lot on wood or peat. Today dining out is seen as an indulgence, but it was the cheapest way to eat for most of human history. But by the 18th century, capitalism took off, public spaces became sites of rational dialogue which were open to all. Eating out became less of a communal activity focused on calorie intake and more of a cultural experience—and a place where people could show off their wealth.

By the 20th century, however, cooking at home was becoming ever easier. Average house sizes grew and appliances such as the food processor and the dishwasher reduced preparation and clean-up times. Dining out became relatively more expensive. And yet, a few economic changes ensured that demand for restaurants grew despite rising prices.

One of them is immigration. Over the last century the net **flow** of migrants into rich countries, relative to population, more than quadrupled. Starting a restaurant is a good career move for new arrivals. Migrants also tend to improve the quality of an area's restaurants. Another factor was changing working patterns. Historically poor people have tended to work longer hours than rich ones. But in the latter half of the 20th century the opposite became true. The **upshot** was that the people with the most money to spend on dining out increasingly needed it most, since they had the least free time.

The pandemic has led to many people buying more takeout than before, while others have a newfound love of cooking. That means _____ still further from the utilitarian model of the 18th century and before, and instead doubling down on what they do best: offering those who need to eat a taste of romance, glamour, and love.

Q71. What effect of the pandemic on restaurants has been mentioned by the author in the passage?

- (a) A severe lack of essential items has hindered the supply chain of restaurants.
- (b) The period during the pandemic led to a stop in the growth of restaurants.
- (c) The pandemic has made people realise the allure of eating out at restaurants.
- (d) Restaurants observe less customers due to a fear of lack of social distancing measures.
- (e) Due to the continuous waves of the pandemic, restaurants struggle to remain open.

Q72. What compelled rich people to start eating out?

- (a) Public spaces becoming safer for citizens
- (b) The rise of capitalism in the market
- (c) Being able to show off wealth to society
- (d) Both (b) and (c)
- (e) All of the above

Q73. According to the passage, why did people prefer eating out before the 17th century?

- (a) Eating at restaurants was cheaper for people than cooking food.
- (b) Restaurants provided a convenient way for people to have food.
- (c) Restaurants catered to all classes of society while avoiding conflict
- (d) Both (a) and (b)
- (e) All of the above

Q74. What conundrum does the author present against the growth of restaurants the past century?

- (a) Despite the economic instability during the period, restaurants continued to grow.
- (b) Restaurants were popular despite industrialisation leading to many people becoming poor.
- (c) The interest in restaurants piqued in the period despite many nations being war-ridden.
- (d) The growth of restaurants despite cooking becoming cheaper and more convenient.
- (e) The deadly plagues during the period did not dissuade people from going out to eat.

Q75. How did migrants contribute to a rise in the growth of restaurants?

- (a) Migrants added to the population of a country and thus contributed to increased consumption.
- (b) A significant portion of the migrant population started restaurants in the countries they came to.
- (c) Countries with a high rate of immigration gave relaxations on items of necessity for the public.
- (d) An immigrant population brought with it a different culture, thus reviving interest in cuisine.
- (e) Restaurants cashed up on the opportunity to serve food to an immigrant population for revenues.

Q76. According to the passage, which of the following is true regarding the influence of changing work patterns in the past century?

- (a) Poor people stopped eating out as much as they would in the past.
- (b) Restaurants improved their services to cater to more people for a longer time.
- (c) Rich people having more money would want to spend more on their indulgences.
- (d) People earning more often had less time to cook food at home.
- (e) Eating out for luxury became difficult for people due to lack of time.

Q77. Which of the following words can most appropriately fill the blank given in the passage?

- (a) coping
- (b) closing
- (c) making

Efficiency of A = $\frac{72}{24} = 3$ unit/day

Efficiency of B = $\frac{72}{18} = 4$ unit/day

Total work done by A in four days = $3 \times 4 = 12$ units

Remaining work = $72 - 12 = 60$ units

Required days = $\frac{60}{(4+3)} + 4 = 12\frac{4}{7}$ days

S37. Ans.(c)

Sol. Let Q joined business after 't' months

Sol. Let total boys in school be X

$$\text{So, total passed boys in school} = X \times \frac{60}{100} = \frac{3X}{5}$$

ATQ -

$$\frac{3X}{5} \times \frac{2}{3} = 160$$

$$\frac{2X}{5} = 160$$

$$X = 400$$

Total girls passed in school

$$= (360 - 160 \times \frac{3}{2}) = 120$$

$$\text{Total girls in school} = 120 \times \frac{100}{40} = 300$$

$$\text{So, total students in school} = (400 + 300) = 700$$

$$a - 12 = 2b - 24$$

$$a = 2b - 12 \text{ ----- (ii)}$$

Form (i) & (ii) we get

$$14 + b = 2b - 12$$

$$b = 26$$

$$\text{So, present age of A} = 26 + 14 = 40 \text{ years}$$
